Languages: JavaScript, Python, HTML5, CSS3, SQL, Java

Frameworks: jQuery, Django, Bootstrap, Node.js, Angular, React, Flask, Redux

Other: Git/GitHub, Amazon AWS, API, Google App Engine, Firebase, Mango Database

Projects (For all projects, please visit my website and GitHub):

Item Catalog - <https://github.com/jiadai777/ItemCatalog>

August 2017

- Created a multi-page, python-based website where users can log in securely with their google account
- Item and user information are database-driven, where information of logged in users and their items are stored in SQL database. Users can add, edit, and delete their items only.
- JSON endpoints are implemented for items, and third party can access them easily.

Multi-User Blog - <https://github.com/jiadai777/Blog-Project>

June 2017

- A blog website built using Google App Engine
- Users can register accounts and their passwords are securely hashed, and safely stored in Google's cloud database.
- Webpages are handled by Jinja2 templates, which makes code maintenance easier and code writing faster.

Work Experience:

Matsuyama Restaurant – Full Stack Web Developer Manteca, CA | Nov 2018 – Present

- Designing and coding a multi-page, responsive, and component-based website.
- Deploying website on Turbo 360 and maintaining daily updates.
- Using skills in html, css, javascript, node.js, Express, Turbo 360

PUNDIT – Full Stack Web Developer

Berkeley, CA | Aug 2018 – Nov 2018

- Collaborated in coding the front end and backend of the first political social multi-page website using html, css, javascript, python, and angular.
- Integrated front end components with backend code using Jinja2 templates.
- Deployed app on Google app engine at www.pundit.today.

Certificates:

Coursera - **Artificial Intelligence and Machine Learning**

Current

Udacity - Full Stack Web Developer Nanodegree

August 2017

Richmond, CA
